

Cybersecurity Strength in Numbers

In a world that serves up new challenges every day, it's more important than ever to focus on your strategic priorities. When it comes to cybersecurity, is it better to build and maintain a SOC alone or partner with experts to strengthen and bring scale to SecOps? Let's take a look at the numbers.

DO-IT-YOURSELF

Security Operations Center

(for an organization with 5,000 employees)

\$1.31M

Talent and training
(team of 14)

\$1.7M+

Total year-one investment

Varies

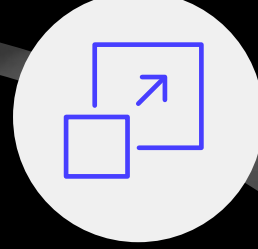

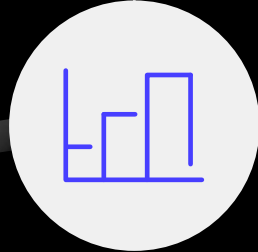

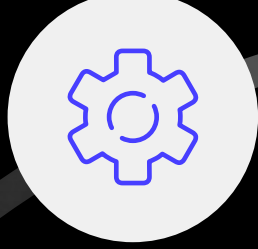

Real world experience

\$412K

Technology and support

Varies

Readiness & scale

Rather than do it yourself, investing in a trusted security partner like Secureworks is not only more cost-effective – it's simply more effective. With the power of our network effect, you benefit whenever new threats are detected, regardless of where they are found.

24x7x365 Managed Detection and Response

Secureworks®

20+

Years of attack and
threat actor data

Threat intelligence

100%

Empowering
Freedom to focus on
your core business

\$1.35M+

Average projected savings*

4.6X Lower TCO

The numbers speak for themselves.

Secureworks Taegis™ ManagedXDR brings together the power and analytics of Taegis XDR with proactive threat hunting and incident response to quickly identify and remediate advanced threats 24x7x365.
