

Abnormal for Microsoft 365

Complement Microsoft's threat intelligence-based defenses with precise, behavioral analysis-based protection against all email and account takeover attacks.

Fastest Path to Complete Protection

Deploy in minutes at any scale. No configuration or custom policies required.

Works with Microsoft Defender for Office 365

More than half of Abnormal enterprise customers do not use a SEG.

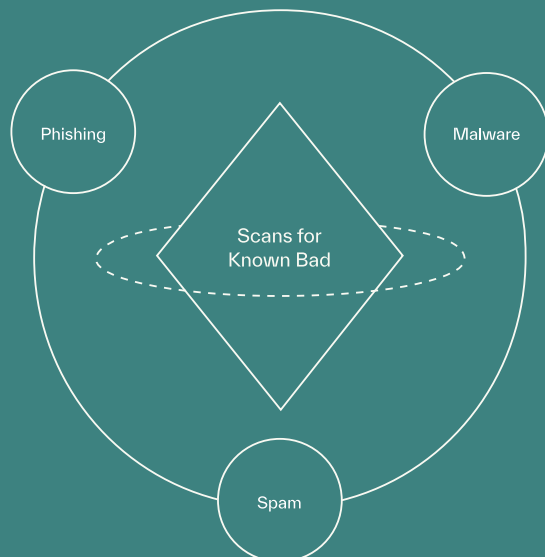

Integrated Admin and End-User Experience

Single management pane for Microsoft and Abnormal, plus native Outlook experience for users.

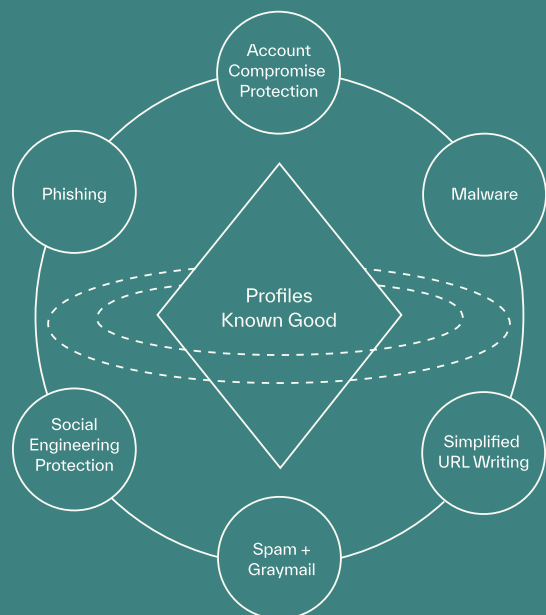

Microsoft Threat Intel

- Basic Spam
- No Graymail
- Malware Protection
- Phishing Protection

Abnormal Behavioral AI

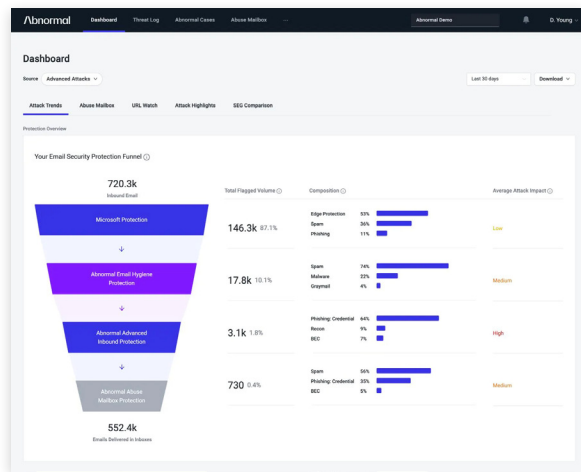

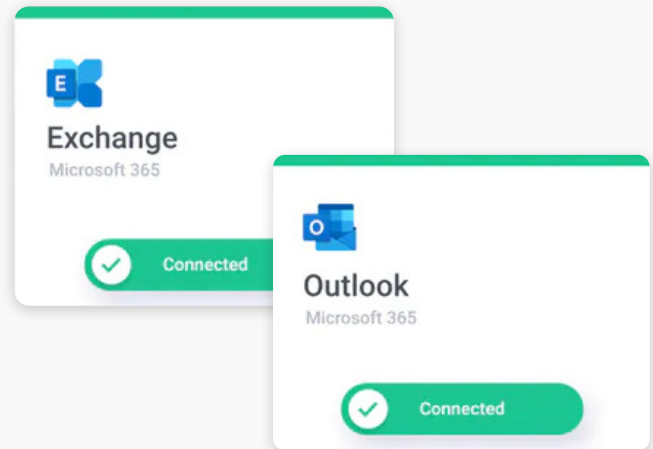

- Behavioral Spam
- Behavioral Graymail
- Behavioral Malware Protection
- Phishing Protection
- Simplified URL Rewriting
- Social Engineering Protection
- Account Compromise Protection

Natively Integrates with Microsoft

Integrate within minutes via APIs, without any disruption to email flow. No changes to your email configuration or MX records are required.

Plus, there is no need to configure Abnormal or to set custom policies. It learns from existing emails to baseline good behavior and stop all bad email.

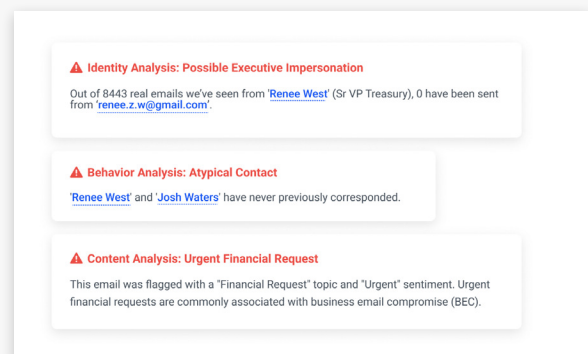

Integrated Visibility and Control

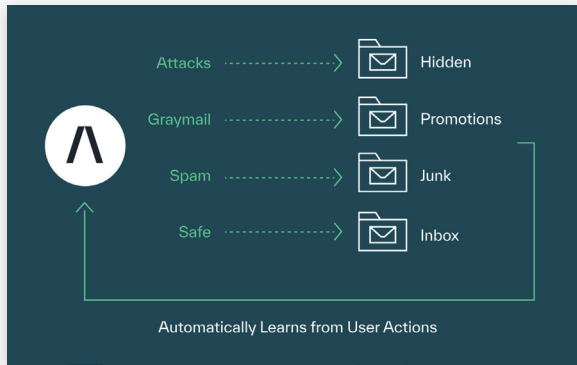

With a single pane of glass, analysts no longer need to toggle between the Microsoft dashboard and other email security solution dashboards.

With deep integration, you get unified visibility and control across Microsoft 365 and Abnormal, greatly simplifying investigation, remediation, follow-up, and reporting.

Enhance Microsoft with Behavioral AI

By deeply understanding entities—users and vendors, their behavior, relationships, and tone and content shared—Abnormal precisely detects anomalies and blocks attacks that evade Microsoft.

Improved End-User Experience and Productivity

Abnormal learns end-user preferences by observing how they move messages between folders, allowing it to automatically create and manage individualized safe and blocklists, as well as deliver spam and graymail to junk and promotional folders respectively. End users no longer have to rely on spam and quarantine digests to salvage missed messages.

Defense in Depth Protection

Microsoft 365 + **Abnormal** =
Threat Intel / Known Bad Attack Protection Behavioral / Known Good Attack Protection

Defense in Depth
Better Together
