

SEEKR INQUIRY FORM

Below please find questions pertaining to the Financial vertical.

1. How are you using AI today to dig through messy data from different systems for faster account matching, risk checks, or investment ideas—and can you easily see exactly how it got those answers?

2. Where do your teams struggle most catching new types of fraud or sorting cases while keeping perfect audit records—and how much do you trust the AI reasoning behind each alert?

3. For rules like SR 11-7, CECL, KYC, or AML compliance, how confident are you that your AI decisions can be explained step-by-step to regulators?

4. In loan approvals—like checking income, reading bank statements, or affordability—which steps could SEEKR's explainable AI speed up while still showing exactly what it looked at?

5. How do you turn raw stuff like earnings calls, SEC filings, and news into clear buy/sell signals today—and can you trace each insight back to specific sentences or documents?

6. In risk management, how much time do analysts waste manually matching policies, contracts, and compliance docs across countries—when SEEKR could show the exact matching logic?

7. If SEEKR's explainable AI could automatically collect proof, organize it, and show regulators exactly how it connected the dots for fraud cases, which numbers would improve first?

8. How well do your tools protect privacy, spot AI bias, and prove model reliability on big-money calls—with SEEKR's full audit trail showing every decision step?

9. When finance, purchasing, or compliance teams handle shared work, what's slowing them down most when pulling insights from messy docs—especially when you can't see the AI's reasoning?

10. Looking 12-18 months ahead, if SEEKR's explainable AI could fix one big headache in fraud detection, rule-following, or investment research—with every answer fully sourced and traceable—what would give your firm the best payoff?
